About Me

I am a hardworking third year Software Engineering undergraduate. I have experience working in the website design industry as a freelance web developer. My studies of software engineering and my passion for website design have driven me to want a career in software engineering. I have worked along side the RAF to develop a data management solution using PowerBI for 20 Squadron, which provided me with knowledge of the lean start-up methodology as well as interviewing for project requirements. Freelance web development has allowed me to utilise and exponentially increase my programming skills.

My Education

UNIVERSITY OF PORTSMOUTH 2020 - Present

BA Hons Software Engineering.
Expected Grade: Expected grade: 2:1.

My degree focuses on the development of web applications, how data can be structured to best access and store information, the complex inner workings of databases, how computer architecture effects software and the ways that a development team can be managed. I have also covered machine learning concepts and how neural networks function.

Skills obtained:

- How to work within a development team using an Agile approach.
- How to write clean, maintainable and modular code.
- Multiple coding languages:
    - Javascript
    - PHP
    - SQL (PostgreSQL, MYSQL)
    - HTML5 & CSS
    - Python (limited)
    - C# (Limited)

- C++ (limited)
- Neural networks and machine learning techniques.
- How to manage the workflow of a project and how you should communicate with a client.
- Advanced Maths.

FAREHAM COLLEGE 2017 – 2019

IT Practitioners level 3 Extended Diploma.
Overall Grade: Distinction, Merit, Merit (A, B, B).

KING'S SCHOOL WINCHESTER 2013 - 2017

GCSEs.
Grades: 6 obtained at grades A-C, including Mathematics, English Language and Science.

Relevant Experience

Ministry Of Defence - RAF 20 Squadron 2022 - 2023

Position: Researching a new approach for 20 Squadron's data management issue.

- Regular weekly meetings with the Squadron Leader.
- Frequent interviews to gather product requirements.
- Development of a minimum viable product for the squadron via the use of Microsoft PowerBi.
- Regular pitch presentations to stake holders to inform them on changes to the project.
- Minimum viable product is being implemented by the Squadron.

New Dawn Publications 2020 – Present.

Position: Website developer, graphic designer and social media manager.

- Meet regularly with the client to show and discuss progress with their website.
- Create logos and various other graphical media such as advertisements.
- Manage the client's social media accounts.

- Currently building two websites for the client.

Timeless Classique **2022 - Present.**

Position: Website developer & graphic designer.

- Meet regularly with the client to show and discuss progress with their website.
- Currently building a commerce website for the client.
- Create logos and other graphical attributes.

Other Experience

Three Joes, Fareham **2022 - Present**

Position: Pizza Chef

- Communicate clearly with other kitchen staff and front of house staff.

Pizza Express, Port Solent **2019 – 2020.**

Position: Pizza Chef

- Communicated clearly with other kitchen staff and front of house staff.
- Supervisor for trainee pizza chefs.

Baytree Tearooms, Wickham **2017 – 2019**

Position: Cook

- Communicated clearly with other kitchen staff and front of house staff.

Additional Information

- I'm currently building a car related blog with information surrounding almost all things to do with cars. Project can be found on my `Github`
- **English** is my native language. I also have a good understanding of **Spanish** when reading and in conversation. I lived in Spain from ages 8-12.
- I love to learn and gather new skill sets. One of my favourite ways of doing so is reading. There are an almost infinite number of books to read on an almost infinite number of subjects... that fact excites me.

Interests & Activities

- Huge passion for cooking, both at dinner and my spare time.
- Website design and development.

- Reading.
- Exercising
- Graphic design, both as a hobby and freelance.
- Anything related to cars.
